

Carbonkraft

Carbonkraft is an endowment grounded upon the target of recycling plastic technology constituted by **ABHIJITH K M (M3 TPLC) and JESIL M N (M3 TPLC) registered on 13th July 2018 at GECBH**. Carbonkraft envisages for a greener Earth by promoting the idea of repurposing trash and thereby effecting on the absolute obliteration of detritus.

Carbonkraft deals with the conversion of plastics to handy products initially aiming at minimizing the use of virgin plastics. Carbonkraft products entail the quality and aesthetics compatible for contemporary style buildings. Some of the primary / introductory products by the team are:

1. Recycle bins
2. Flower vases / indoor plant vases
3. Customized wall mounted shelves
4. Phone cases
5. School bags, wallets, hand bags

Furthermore the squad focuses on trading the machines at an economical rate such that school, colleges and certain circle of people could foster the art and skills of plastic management. For by the team also seeks on augmenting the company and its services overseas. Moreover the team is planning to institute training and skill improvement programs for indigent community as well.

Through CarbonKraft, we would like to introduce the incredible opportunities of recycling into the world, which in the long run will eliminate pollution and climate changes. Initially, we aim to reduce the demand for new virgin plastic and closing its materials loop while creating better livelihoods for people around the world. CarbonKraft is, above all, a cultural tool to alter the way society perceives garbage. Apart from producing products, we focus on developing a community devout to recycling and in order to accomplish the goal we are planning to institute training programs and skill development initiatives. We are enthusiastic to contribute our technology for a brighter and greener future of our planet.
