The second law of thermodynamics states that:

- Energy can neither be created nor destroyed
- Energy flows from a higher temperature to a lower temperature
- None of the above
- The total entropy of an isolated system always decreases

This law explains why heat flows from hot to cold.

TO WHOMSOEVER IT MAY CONCERN

This is to proudly certify that the National Service Scheme (NSS) Unit of Government Engineering College, Barton Hill, Thiruvananthapuram, in collaboration with Kiranam Trust, successfully carried out impactful social service initiatives during the academic year 2024–2025.

The activities included hair donation, blood donation Drive and food donation campaigns. The dedication, teamwork, and discipline shown by the volunteers and coordinators are highly appreciated.

Kiranam Trust values the NSS Unit's commitment to community welfare and youth led civic action. We wholeheartedly recommend them for future collaborations promoting social change.
